

# EASY ON

Series

## Easy On

Quick and easy passenger loading makes the Easy On bus the right choice for many shuttle applications. With floor plan options that seat up to 28 passengers, the Easy On is versatile enough to meet a wide variety of needs.

This extraordinary bus is built on an LF72 Workhorse custom chassis featuring an 8" low entry, with the optional kneeling feature. The chassis is built with StabilRide™ air-over-leaf-suspension and an integrated stabilizer bar that provides a comfortable ride and superior handling. With a powerful Duramax 6.6 liter engine and rugged Allison transmission, this is NOT your traditional bus!

Passengers can quickly board the Easy On bus, even with mobility aids such as wheelchairs and scooters, thanks to the optional ramp, greatly reducing loading and unloading times.

No steps, no lifts. . . just easy entry and egress. Easy On by Glaval Bus.
